

Marine Diesel Protect

Description

Anti-bacterial biocide with broad spectrum of activity against bacteria, yeast and mold. The biocide active agent does not form any corrosive combustion products. For the long-term preservation while in storage of marine engines with a low diesel flow rate. The cleaning components contained in the product ensure optimal cleanliness of the entire fuel system. The corrosion protection also included protects metal components perfectly. The cetane number booster makes starting on restarts easy. The greatest possible engine performance is guaranteed. **Use biocides safely. Always read the label and product information before use.**

Properties

- highly effective
- decontaminates infested tank systems
- active in preventing bacterial infestation
- cleans and maintains
- boosts the cetane number
- Excellent aging protection

Areas of application

For preventive use and for de-infesting contaminated tank systems on vessels and in storage tanks. Use a 1:200 booster dose for systems which are already contaminated. One measuring cup (25 ml) is sufficient for 5 l of diesel fuel. As a preventive 1:1000 application, one fill of the dosage chamber (25 ml) is sufficient for 25 l of diesel

Application

Use a 1:200 booster dose for systems which are already contaminated. One measuring cup (25 ml) is sufficient for 5 l of diesel fuel. As a preventive 1:1000 application, one fill of the dosage chamber (25 ml) is sufficient for 25 l of diesel Shake container before use.
